OAVS Computer Teacher (TGT) Exam

Comprehensive MCQ Question Bank

Subject	**Computer Fundamentals**
Total Questions	**300+ MCQs (Main) + 50 MCQ Mock Test**
Exam Relevance	**OAVS TGT, KVS, DSSSB, CTET, OSSTET, NVS**
Difficulty Level	**Easy to Advanced (Mixed)**
Format	**4-option MCQ with Answers & Explanations**

This question bank covers all topics from the OAVS TGT Computer syllabus as prescribed. Questions include conceptual, factual, application-based, assertion-reason, statement-based, match-the-following, and previous-year exam style questions. Use the Mock Test at the end for timed practice. All answers with explanations are provided.

TABLE OF CONTENTS

- Section 1: Introduction to Computers (Q1–Q15)
- Section 2: Block Diagram of Digital Computer (Q16–Q30)
- Section 3: Memory – Primary, Secondary & Hierarchy (Q31–Q55)
- Section 4: CPU – Functions, Characteristics & Processors (Q56–Q70)
- Section 5: Input Devices (Q71–Q90)
- Section 6: Output Devices (Q91–Q105)
- Section 7: Secondary Storage Devices (Q106–Q125)
- Section 8: Scanners, Digitizers, Plotters & Modern Peripherals (Q126–Q140)
- Section 9: Hardware and Software (Q141–Q160)
- Section 10: Types of Computers (Q161–Q180)
- Section 11: Assertion–Reason & Statement-Based MCQs (Q181–Q190)
- Section 12: Match-the-Following Style MCQs (Q191–Q200)
- Section 13: Advanced & Higher-Order Thinking Questions (Q201–Q220)
- Section 14: Networking & Internet Basics – Bonus (Q221–Q230)
- Section 15: Previous-Year Style & Miscellaneous MCQs (Q231–Q250)
- MOCK TEST: 50-Question Mixed Paper with Answer Key

SECTION 1: Introduction to Computers

Q1. Which of the following is the most accurate definition of a computer?

A. An electronic device that stores data
B. An electronic device that accepts data, processes it, stores it and produces output
C. A machine that performs calculations only
D. A device that displays information

✔ **Answer: B**

■ *A computer is defined by its four functions: Input → Process → Output → Storage.*

Q2. The full form of COMPUTER as an acronym is:

A. Common Operating Machine Particularly Used for Training, Education and Research
B. Common Operated Machine Particularly Used for Technical, Education and Research
C. Commonly Operated Machine Particularly Used for Trade, Education and Research
D. None of the above

✔ **Answer: A**

■ *This is a backronym; the actual word 'computer' comes from 'compute'.*

Q3. The term 'computer' is derived from the Latin word:

A. Computo
B. Computare
C. Computatio
D. Computus

✔ **Answer: B**

■ *'Computare' means 'to calculate' in Latin.*

Q4. Charles Babbage is known as the 'Father of Computer' because he invented the:

A. Analytical Engine
B. Difference Engine
C. Both A and B
D. ENIAC

✔ **Answer: C**

■ *Babbage designed both the Difference Engine (1822) and the Analytical Engine (1837).*

Q5. The first electronic digital computer was:

A. UNIVAC
B. ENIAC
C. ABC
D. EDVAC

✔ **Answer: B**

■ *ENIAC (Electronic Numerical Integrator and Computer) was completed in 1945 at the University of Pennsylvania.*

Q6. UNIVAC stands for:

A. Universal Automatic Computer
B. Universal Analog Computer
C. Unique Automatic Computer
D. Universal Advanced Computer

✔ **Answer: A**

■ *UNIVAC (1951) was the first commercially available computer in the USA.*

Q7. Which generation of computers used vacuum tubes?

A. First Generation
B. Second Generation
C. Third Generation
D. Fourth Generation

✔ **Answer: A**

■ *First-generation computers (1940–1956) used vacuum tubes as basic building blocks.*

Q8. Transistors were used in which generation of computers?

A. First
B. Second
C. Third
D. Fourth

✔ **Answer: B**

■ *Second-generation computers (1956–1963) replaced vacuum tubes with transistors.*

Q9. Integrated Circuits (ICs) were introduced in which computer generation?

A. Second
B. Third
C. Fourth
D. Fifth

✔ **Answer: B**

■ *Third-generation computers (1964–1971) used Small Scale Integration (SSI) ICs.*

Q10. Microprocessors were introduced in which generation of computers?

A. Third
B. Fourth
C. Fifth
D. Sixth

✔ **Answer: B**

■ *Fourth-generation (1971–present) computers use microprocessors – entire CPU on a single chip.*

Q11. Which of the following is NOT a characteristic of a computer?

A. Speed
B. Accuracy
C. Intelligence
D. Diligence

✔ **Answer: C**

■ *Computers have speed, accuracy, diligence, and memory but they lack human-like intelligence.*

Q12. The speed of a computer processor is measured in:

A. Hertz (Hz)
B. Bits per second
C. Bytes
D. Volts

✔ **Answer: A**

■ *Processor speed is measured in Hertz (Hz), typically GHz (gigahertz) for modern CPUs.*

Q13. Which of the following is the fastest type of computer?

A. Minicomputer
B. Mainframe
C. Supercomputer
D. Microcomputer

✔ **Answer: C**

■ *Supercomputers are the fastest and most powerful computers, used for complex scientific calculations.*

Q14. Data processed by a computer is known as:

A. Input
B. Raw data
C. Information
D. Code

✔ **Answer: C**

■ *When raw data is processed and given meaning, it becomes information.*

Q15. Which of the following is an example of data?

A. 'The average temperature is 35°C'
B. '35'
C. 'It is very hot today'
D. 'Summer is hot in Delhi'

✔ **Answer: B**

■ *Raw, unprocessed facts like numbers are data; interpreted results are information.*

SECTION 2: Block Diagram of Digital Computer

Q16. The five main functional units of a computer are:

A. Input, Output, Memory, CPU, Bus
B. Input Unit, Output Unit, Memory Unit, ALU, Control Unit
C. Keyboard, Monitor, RAM, ROM, Processor
D. Hardware, Software, Memory, Storage, Display

✔ **Answer: B**

■ *The five units: Input Unit, Output Unit, Memory Unit (Primary + Secondary), ALU, Control Unit. Together ALU + CU = CPU.*

Q17. Which unit of the computer directs and coordinates all operations?

A. ALU
B. Memory Unit
C. Control Unit
D. Input Unit

✔ **Answer: C**

■ *The Control Unit (CU) acts as the 'brain's manager' – it directs and coordinates all computer operations.*

Q18. Which unit performs arithmetic and logical operations?

A. Control Unit
B. ALU
C. Memory Unit
D. Output Unit

✔ **Answer: B**

■ *ALU (Arithmetic Logic Unit) performs all arithmetic (+, –, ×, ÷) and logical (AND, OR, NOT) operations.*

Q19. CPU stands for:

A. Central Processing Unit
B. Computer Processing Unit
C. Central Program Unit
D. Core Processing Unit

✔ **Answer: A**

■ *CPU = Central Processing Unit, comprising the Control Unit and ALU.*

Q20. The CPU is often called the _____ of the computer.

A. Heart
B. Brain
C. Memory
D. Spine

✔ **Answer: B**

■ *The CPU processes all data and instructions, hence it is called the brain of the computer.*

Q21. Which of the following is an output device?

A. Keyboard
B. Scanner
C. Monitor
D. Mouse

✔ **Answer: C**

■ *A monitor displays output. Keyboard, scanner, and mouse are input devices.*

Q22. Which of the following is an input device?

A. Printer
B. Plotter
C. Monitor
D. Light Pen

✔ **Answer: D**

■ *A light pen is an input device used to select items on a screen.*

Q23. The process of converting data into information is called:

A. Storage
B. Input
C. Processing
D. Output

✔ **Answer: C**

■ *Processing transforms raw data into meaningful information.*

Q24. The data bus in a computer is used to:

A. Transfer addresses
B. Transfer data between components
C. Send control signals
D. Connect to the internet

✔ **Answer: B**

■ *The data bus carries actual data between CPU, memory, and I/O devices.*

Q25. Which register in the CPU holds the address of the next instruction to be executed?

A. Accumulator
B. Program Counter (PC)
C. Instruction Register
D. Memory Address Register

✔ **Answer: B**

■ *The Program Counter (PC) keeps track of the address of the next instruction to fetch.*

Q26. The register that holds the instruction currently being executed is called:

A. Program Counter
B. Stack Pointer
C. Instruction Register (IR)
D. Memory Buffer Register

✔ **Answer: C**

■ *IR holds the current instruction being decoded and executed.*

Q27. MAR stands for:

A. Memory Address Register
B. Main Access Register
C. Memory Arithmetic Register
D. Master Access Register

✔ **Answer: A**

■ *MAR stores the address of memory location being accessed.*

Q28. MDR/MBR stands for:

A. Memory Data Register / Memory Buffer Register
B. Main Data Register / Main Bus Register
C. Memory Drive Register / Memory Binary Register
D. None of the above

✔ **Answer: A**

■ *MDR (Memory Data Register) or MBR (Memory Buffer Register) holds data being transferred to/from memory.*

Q29. The accumulator register is part of which unit?

A. Control Unit
B. Input Unit
C. ALU
D. Output Unit

✔ **Answer: C**

■ *The accumulator is a special-purpose register in the ALU that stores intermediate arithmetic results.*

Q30. Which bus carries signals for read/write operations?

A. Data Bus
B. Address Bus
C. Control Bus
D. System Bus

✔ **Answer: C**

■ *The Control Bus carries control signals like read, write, clock, interrupt, etc.*

SECTION 3: Memory – Primary, Secondary & Hierarchy

Q31. Which type of memory is directly accessible by the CPU?

A. Secondary Memory
B. Primary Memory
C. Tertiary Memory
D. Virtual Memory

✔ **Answer: B**

■ *Primary memory (RAM, ROM, Cache) is directly accessed by the CPU at high speed.*

Q32. RAM stands for:

A. Random Access Memory
B. Read Access Memory
C. Rapid Access Memory
D. Read Arithmetic Memory

✔ **Answer: A**

■ *RAM = Random Access Memory; it is volatile and stores data temporarily.*

Q33. ROM stands for:

A. Read Only Memory
B. Random Only Memory
C. Read Operational Memory
D. Rapid Output Memory

✔ **Answer: A**

■ *ROM = Read Only Memory; it is non-volatile and contains firmware.*

Q34. Which of the following memory is volatile?

A. ROM
B. EPROM
C. RAM
D. Flash Memory

✔ **Answer: C**

■ *RAM loses its data when power is switched off (volatile); ROM and Flash are non-volatile.*

Q35. Which memory is the fastest in the memory hierarchy?

A. RAM
B. Cache Memory
C. Registers
D. Hard Disk

✔ **Answer: C**

■ *Registers inside the CPU are the fastest memory (sub-nanosecond access), followed by Cache → RAM → Secondary.*

Q36. Cache memory is located:

A. On the hard disk
B. On the motherboard away from CPU
C. Between CPU and RAM (on or near CPU)
D. Inside the RAM stick

✔ **Answer: C**

■ *Cache sits between CPU and RAM to reduce the speed gap, storing frequently used data.*

Q37. EPROM stands for:

A. Erasable Programmable Read Only Memory
B. Electronic Programmable Read Only Memory
C. Erasable Peripheral Read Only Memory
D. Extra Programmable Read Only Memory

✔ **Answer: A**

■ *EPROM can be erased using ultraviolet (UV) light and reprogrammed.*

Q38. EEPROM stands for:

A. Electrically Erasable Programmable Read Only Memory
B. Electronic Erasable Programmable Read Only Memory
C. Extra Erasable Programmable ROM
D. Electronically Extended Programmable ROM

✔ **Answer: A**

■ *EEPROM can be erased and reprogrammed using electrical signals.*

Q39. Which memory technology is used in pen drives and SSDs?

A. DRAM
B. SRAM
C. Flash Memory
D. EPROM

✔ **Answer: C**

■ *Flash memory (a type of EEPROM) is used in pen drives, SSDs, and memory cards.*

Q40. DRAM stands for:

A. Dynamic Random Access Memory
B. Direct Random Access Memory
C. Digital Random Access Memory
D. Double Random Access Memory

✔ **Answer: A**

■ *DRAM stores data using capacitors that need periodic refreshing; it is slower but cheaper than SRAM.*

Q41. SRAM stands for:

A. Static Random Access Memory
B. Standard Random Access Memory
C. Synchronous Random Access Memory
D. Simple Random Access Memory

✔ **Answer: A**

■ *SRAM uses flip-flops; it is faster and more expensive than DRAM, used for cache memory.*

Q42. The correct order of memory hierarchy from fastest to slowest is:

A. Registers → Cache → RAM → Secondary Storage
B. RAM → Cache → Registers → Secondary Storage
C. Cache → Registers → RAM → Secondary Storage
D. Secondary Storage → RAM → Cache → Registers

✔ **Answer: A**

■ *Registers (fastest, smallest) → Cache → RAM → Secondary Storage (slowest, largest).*

Q43. How many bits are in one byte?

A. 4
B. 8
C. 16
D. 32

✔ **Answer: B**

■ *1 byte = 8 bits. This is a fundamental unit of digital information.*

Q44. 1 Kilobyte (KB) equals how many bytes?

A. 1000 bytes
B. 1024 bytes
C. 512 bytes
D. 2048 bytes

✔ **Answer: B**

■ *1 KB = 2^10 = 1024 bytes (binary system used in computing).*

Q45. 1 Megabyte (MB) equals:

A. 1024 KB
B. 1000 KB
C. 2048 KB
D. 512 KB

✔ **Answer: A**

■ *1 MB = 1024 KB = 2^20 bytes = 1,048,576 bytes.*

Q46. 1 Gigabyte (GB) equals:

A. 1024 MB
B. 1000 MB
C. 1024 KB
D. 1000 KB

✔ **Answer: A**

■ *1 GB = 1024 MB = 2^30 bytes.*

Q47. 1 Terabyte (TB) equals:

A. 1024 MB
B. 1024 GB
C. 1000 GB
D. 1024 KB

✔ **Answer: B**

■ *1 TB = 1024 GB = 2^40 bytes.*

Q48. The correct ascending order of memory units is:

A. Bit < Byte < KB < MB < GB < TB < PB
B. Byte < Bit < KB < MB < TB < GB
C. Bit < Byte < MB < KB < GB < TB
D. Bit < Byte < KB < GB < MB < TB

✔ **Answer: A**

■ *Petabyte (PB) = 1024 TB. The order is: Bit → Nibble(4 bits) → Byte(8 bits) → KB → MB → GB → TB → PB → EB.*

Q49. Virtual memory is a technique that:

A. Increases the physical size of RAM
B. Uses secondary storage to extend RAM capacity
C. Speeds up the hard disk
D. Replaces cache memory

✔ **Answer: B**

■ *Virtual memory uses part of the hard disk as an extension of RAM, allowing larger programs to run.*

Q50. Which type of RAM retains data as long as power is applied and needs NO refreshing?

A. DRAM
B. SDRAM
C. SRAM
D. DDR-RAM

✔ **Answer: C**

■ *SRAM (Static RAM) uses flip-flops and does not need periodic refresh cycles.*

Q51. The BIOS of a computer is stored in:

A. RAM
B. Hard Disk
C. ROM/Flash Memory
D. Cache

✔ **Answer: C**

■ *BIOS (Basic Input/Output System) is stored in ROM or Flash memory on the motherboard.*

Q52. Which memory level in cache hierarchy is closest to the CPU?

A. L3 Cache
B. L2 Cache
C. L1 Cache
D. L4 Cache

✔ **Answer: C**

■ *L1 (Level 1) cache is the closest to the processor core, fastest but smallest.*

Q53. A nibble consists of how many bits?

A. 2
B. 4
C. 8
D. 16

✔ **Answer: B**

■ *A nibble = 4 bits = half a byte.*

Q54. DDR stands for (in context of RAM):

A. Double Data Rate
B. Dual Data Register
C. Direct Data Read
D. Dynamic Data Ram

✔ **Answer: A**

■ *DDR SDRAM (Double Data Rate Synchronous DRAM) transfers data on both rising and falling edges of the clock.*

Q55. Which of the following is secondary storage?

A. RAM
B. Cache
C. Hard Disk Drive (HDD)
D. ROM

✔ **Answer: C**

■ *HDD, SSD, CD, DVD, pen drives are all secondary (auxiliary) storage devices.*

SECTION 4: CPU – Functions, Characteristics & Processors

Q56. The two main components of the CPU are:

A. RAM and ROM
B. ALU and Control Unit
C. Input and Output Unit
D. Hard Disk and Processor

✔ **Answer: B**

■ *CPU = ALU + Control Unit. Registers are also part of CPU.*

Q57. The clock speed of a modern CPU is typically measured in:

A. MHz only
B. GHz
C. KHz
D. THz

✔ **Answer: B**

■ *Modern CPUs operate at GHz (Gigahertz) speeds, e.g., 3.5 GHz.*

Q58. Which of the following best describes the fetch-decode-execute cycle?

A. The cycle of buying, installing, and running software
B. The basic operation cycle of a CPU: fetch instruction → decode it → execute it
C. The process of reading, writing, and storing data
D. The input-process-output cycle

✔ **Answer: B**

■ *The instruction cycle (Fetch → Decode → Execute) is the fundamental operation of any CPU.*

Q59. RISC stands for:

A. Reduced Instruction Set Computer
B. Rapid Instruction Set Computer
C. Random Instruction Set Computer
D. Revised Instruction Set Computer

✔ **Answer: A**

■ *RISC processors have a small, highly optimized set of instructions (e.g., ARM processors).*

Q60. CISC stands for:

A. Complex Instruction Set Computer
B. Complete Instruction Set Computer
C. Compressed Instruction Set Computer
D. Central Instruction Set Computer

✔ **Answer: A**

■ *CISC processors (like x86) have a large set of complex instructions (e.g., Intel/AMD CPUs).*

Q61. Which company manufactures the Pentium processor?

A. AMD
B. Intel
C. IBM
D. ARM

✔ **Answer: B**

■ *Intel manufactures Pentium, Core i3/i5/i7/i9 series processors.*

Q62. The first microprocessor was:

A. Intel 8086
B. Intel 4004
C. Intel 8080
D. Intel 80286

✔ **Answer: B**

■ *Intel 4004 (1971) was the world's first commercially available microprocessor.*

Q63. A multi-core processor means:

A. A processor with multiple CPUs on different chips
B. A processor with multiple processing cores on a single chip
C. A processor with multiple hard drives
D. A processor that processes multiple programs on different computers

✔ **Answer: B**

■ *Dual-core, quad-core, octa-core processors have 2, 4, 8 processing cores on one chip.*

Q64. ALU performs which of the following operations?

A. Arithmetic operations only
B. Logical operations only
C. Both arithmetic and logical operations
D. Memory management operations

✔ **Answer: C**

■ *ALU handles: arithmetic (+, –, ×, ÷) AND logical (AND, OR, NOT, XOR, comparisons).*

Q65. Which unit manages the sequence of operations in a CPU?

A. ALU
B. Cache
C. Control Unit
D. Register

✔ **Answer: C**

■ *The Control Unit sequences and coordinates all CPU operations by sending control signals.*

Q66. Word length of a CPU refers to:

A. The number of instructions in memory
B. The number of bits processed by CPU in one operation
C. The number of words in a program
D. The speed of the CPU

✔ **Answer: B**

■ *Word length (8-bit, 16-bit, 32-bit, 64-bit) defines how much data CPU processes at once.*

Q67. Modern operating systems and most PCs use a ___-bit processor architecture.

A. 8-bit
B. 16-bit
C. 32-bit
D. 64-bit

✔ **Answer: D**

■ *64-bit CPUs can address up to 16 exabytes of RAM theoretically and process 64 bits simultaneously.*

Q68. The term 'overclocking' refers to:

A. Running a CPU slower than its rated speed
B. Running a CPU faster than its rated speed
C. Adding more cores to a CPU
D. Cooling a CPU below 0°C

✔ **Answer: B**

■ *Overclocking increases CPU clock speed beyond manufacturer specifications for better performance.*

Q69. Which of the following is a function of the Control Unit?

A. Execute arithmetic operations
B. Store data permanently
C. Interpret instructions and generate control signals
D. Display output on monitor

✔ **Answer: C**

Q70. Pipelining in CPU refers to:

A. Connecting multiple CPUs
B. Overlapping execution of multiple instructions simultaneously
C. Increasing memory size
D. A cooling technique for processors

✔ **Answer: B**

■ *Pipelining allows different stages of multiple instructions to overlap, improving throughput.*

SECTION 5: Input Devices

Q71. Which of the following is NOT an input device?

A. Keyboard
B. Mouse
C. Printer
D. Scanner

✔ **Answer: C**

■ *Printer is an output device. Keyboard, mouse, and scanner are input devices.*

Q72. A keyboard is primarily which type of device?

A. Output
B. Input
C. Storage
D. Processing

✔ **Answer: B**

Q73. The standard keyboard layout used in most computers is:

A. DVORAK
B. QWERTY
C. AZERTY
D. COLEMAK

✔ **Answer: B**

■ *QWERTY layout was designed by Christopher Sholes in 1873 and is the most widely used.*

Q74. A mouse is which type of input device?

A. Pointing device
B. Scanning device
C. Typing device
D. Recognition device

✔ **Answer: A**

■ *A mouse is a pointing/cursor-control input device.*

Q75. OCR stands for:

A. Optical Character Recognition
B. Optical Character Reader
C. Optical Code Recognition
D. Both A and B

✔ **Answer: D**

■ *OCR is both the process (recognition) and device (reader) that converts printed/handwritten text to digital format.*

Q76. OMR stands for:

A. Optical Mark Reader
B. Optical Mark Recognition
C. Both A and B
D. Original Mark Reader

✔ **Answer: C**

■ *OMR detects marks made in pre-defined positions (used in multiple-choice answer sheets, lotteries).*

Q77. MICR stands for:

A. Magnetic Ink Character Recognition
B. Magnetic Ink Character Reader
C. Both A and B
D. Machine Input Character Recognition

✔ **Answer: C**

■ *MICR is used by banks to process cheques; characters are printed with magnetic ink.*

Q78. Which input technology is used at the bottom of bank cheques?

A. OCR
B. OMR
C. MICR
D. Barcode Reader

✔ **Answer: C**

■ *MICR characters (account number, cheque number, bank code) are printed with magnetic ink on cheques.*

Q79. A barcode reader works on which principle?

A. Magnetic
B. Optical (laser or light)
C. Infrared
D. Ultrasonic

✔ **Answer: B**

■ *Barcode readers use laser or LED light to read the pattern of black bars and white spaces.*

Q80. QR code stands for:

A. Quick Response code
B. Query Response code
C. Queue Reader code
D. Quantified Response code

✔ **Answer: A**

■ *QR codes are 2D barcodes that can store much more data than 1D barcodes; readable by smartphones.*

Q81. A scanner converts physical documents into:

A. Printed copies
B. Digital images/text files
C. Audio files
D. Video files

✔ **Answer: B**

■ *A scanner digitizes physical documents, photos, or images into electronic format.*

Q82. Which type of scanner moves a scanning head across the document?

A. Flatbed scanner
B. Drum scanner
C. Handheld scanner
D. Sheet-fed scanner

✔ **Answer: A**

■ *Flatbed scanners are the most common; the document is placed on a glass bed and a scanning head moves beneath it.*

Q83. Touch screen is which type of device?

A. Input only
B. Output only
C. Both Input and Output
D. Storage device

✔ **Answer: C**

■ *A touchscreen is both an input device (touch input) and output device (display).*

Q84. A joystick is primarily used for:

A. Text input
B. Gaming and flight simulators
C. Scanning documents
D. Printing

✔ **Answer: B**

Q85. Which of the following is a biometric input device?

A. Keyboard
B. Fingerprint scanner
C. Web camera
D. Both B and C

✔ **Answer: D**

■ *Fingerprint scanners and web cameras (for facial recognition) are biometric input devices.*

Q86. A light pen is used to:

A. Print text
B. Draw on or select items on a CRT screen
C. Scan barcodes
D. Read MICR characters

✔ **Answer: B**

■ *Light pens detect light emitted by CRT phosphor and allow direct drawing/selecting on screen.*

Q87. Digitizer/Graphics tablet is used to:

A. Print high-quality images
B. Convert analog drawings to digital format
C. Display 3D images
D. Scan photographs

✔ **Answer: B**

■ *A digitizer/graphics tablet converts hand-drawn sketches into digital data using a stylus.*

Q88. Which device is used to read printed bar codes on grocery products?

A. OMR
B. OCR
C. Barcode Reader
D. MICR

✔ **Answer: C**

Q89. Trackball is a variation of which device?

A. Keyboard
B. Mouse
C. Joystick
D. Scanner

✔ **Answer: B**

■ *A trackball is an upside-down mouse where you roll the ball with your fingers instead of moving the device.*

Q90. Which input device is used in ATM machines?

A. Mouse
B. Scanner
C. Numeric Keypad / PIN pad
D. Joystick

✔ **Answer: C**

■ *ATMs use numeric keypads for PIN entry and sometimes touchscreens.*

SECTION 6: Output Devices

Q91. Which of the following is NOT an output device?

A. Monitor
B. Printer
C. Speaker
D. Keyboard

✔ **Answer: D**

■ *Keyboard is an input device. Monitor, printer, and speakers are output devices.*

Q92. A monitor is also known as:

A. VDU (Visual Display Unit)
B. CPU
C. Scanner
D. Plotter

✔ **Answer: A**

■ *Monitor = VDU (Visual Display Unit) – the primary visual output device.*

Q93. LCD stands for:

A. Liquid Crystal Display
B. Light Crystal Display
C. Liquid Color Display
D. Light Color Display

✔ **Answer: A**

Q94. LED in context of monitors stands for:

A. Light Emitting Diode
B. Liquid Emitting Display
C. Light Emitting Display
D. Liquid Electronic Display

✔ **Answer: A**

■ *LED monitors use Light Emitting Diodes for backlighting or pixel illumination.*

Q95. OLED stands for:

A. Organic Light Emitting Diode
B. Optical Light Emitting Display
C. Organic Liquid Electronic Display
D. Output Light Emitting Diode

✔ **Answer: A**

■ *OLED displays have each pixel emit its own light, providing superior contrast and thinner form factor.*

Q96. Resolution of a monitor is measured in:

A. Hertz
B. Pixels (width × height)
C. Bytes
D. Watts

✔ **Answer: B**

■ *Resolution = number of pixels (e.g., 1920×1080 Full HD). More pixels = sharper image.*

Q97. A plotter is best used for:

A. Printing text documents
B. Printing large engineering/architectural drawings
C. Scanning images
D. Displaying videos

✔ **Answer: B**

■ *Plotters produce large-format, high-precision drawings used in engineering, architecture, and GIS.*

Q98. Which type of printer uses laser technology?

A. Inkjet printer
B. Dot matrix printer
C. Laser printer
D. Thermal printer

✔ **Answer: C**

■ *Laser printers use a laser beam to transfer toner onto paper, producing high-quality prints.*

Q99. Which printer is an impact printer?

A. Laser
B. Inkjet
C. Dot Matrix
D. Thermal

✔ **Answer: C**

■ *Dot matrix printers are impact printers – pins strike an inked ribbon to form characters.*

Q100. DPI stands for (in context of printers/scanners):

A. Dots Per Inch
B. Data Per Inch
C. Display Per Inch
D. Digital Print Index

✔ **Answer: A**

■ *DPI = Dots Per Inch; higher DPI means better print/scan quality.*

Q101. Which type of printer is most suitable for printing carbon copies?

A. Laser
B. Inkjet
C. Dot Matrix
D. 3D Printer

✔ **Answer: C**

■ *Dot matrix printers can print multiple carbon copies because they physically strike the paper.*

Q102. A projector is used to:

A. Enlarge and project images/video onto a large screen
B. Scan large documents
C. Print on large paper
D. Store data

✔ **Answer: A**

■ *Projectors display computer screen output enlarged on a wall or screen, used in presentations.*

Q103. Which of the following is a non-impact printer?

A. Dot Matrix
B. Daisy Wheel
C. Laser
D. Line printer

✔ **Answer: C**

■ *Laser and inkjet printers are non-impact (no physical contact with paper during printing).*

Q104. Inkjet printers work by:

A. Striking ink ribbons onto paper
B. Spraying tiny droplets of ink onto paper
C. Using laser to fuse toner powder
D. Using heated wax

✔ **Answer: B**

Q105. Which output device converts digital audio signals to sound?

A. Microphone
B. Speakers
C. Headphone
D. Both B and C

✔ **Answer: D**

■ *Both speakers and headphones are audio output devices that convert digital signals to audible sound.*

SECTION 7: Secondary Storage Devices

Q106. Secondary storage is also called:

A. Main memory
B. Auxiliary/External memory
C. Cache memory
D. Virtual memory

✔ **Answer: B**

■ *Secondary storage = auxiliary/external storage; it is non-volatile and stores data permanently.*

Q107. Which of the following is a magnetic storage device?

A. CD-ROM
B. DVD
C. Hard Disk Drive (HDD)
D. Pen Drive

✔ **Answer: C**

■ *HDD uses magnetic platters to store data. CD/DVD use optical technology; pen drives use flash.*

Q108. HDD stands for:

A. Hard Disk Drive
B. High Definition Drive
C. Hard Data Drive
D. High Density Disk

✔ **Answer: A**

Q109. SSD stands for:

A. Solid State Drive
B. Super Speed Drive
C. Solid Storage Device
D. Secondary Storage Disk

✔ **Answer: A**

■ *SSD uses flash memory chips; it is faster, lighter, more durable but costlier than HDD.*

Q110. Which is faster – HDD or SSD?

A. HDD
B. SSD
C. Both are equal
D. Depends on size

✔ **Answer: B**

■ *SSDs have no moving parts and use flash memory; read/write speeds are 3–10× faster than HDDs.*

Q111. The storage capacity of a CD-ROM is approximately:

A. 1.44 MB
B. 700 MB
C. 4.7 GB
D. 25 GB

✔ **Answer: B**

■ *CD-ROM stores approximately 700 MB of data. Floppy disks hold 1.44 MB; DVD holds 4.7 GB.*

Q112. The storage capacity of a standard single-layer DVD is:

A. 700 MB
B. 1.44 MB
C. 4.7 GB
D. 25 GB

✔ **Answer: C**

■ *A single-layer DVD stores 4.7 GB. Dual-layer DVD stores 8.5 GB.*

Q113. Blu-ray disc was developed by:

A. Sony and Panasonic led Blu-ray Disc Association
B. Microsoft
C. IBM
D. Apple

✔ **Answer: A**

■ *Blu-ray (named for blue-violet laser used) was developed by the Blu-ray Disc Association led by Sony.*

Q114. The storage capacity of a Blu-ray disc (single layer) is:

A. 4.7 GB
B. 8.5 GB
C. 25 GB
D. 100 GB

✔ **Answer: C**

■ *Single-layer Blu-ray = 25 GB; dual-layer = 50 GB; BDXL = 100–128 GB.*

Q115. CD-ROM stands for:

A. Compact Disc – Read Only Memory
B. Computer Disc – Read Only Memory
C. Compact Disc – Random Output Memory
D. Compact Disc – Readable Output Memory

✔ **Answer: A**

Q116. DVD stands for:

A. Digital Video Disc / Digital Versatile Disc
B. Digital Visual Display
C. Disk Video Drive
D. Dynamic Video Disc

✔ **Answer: A**

■ *DVD was originally called 'Digital Video Disc' but was later also called 'Digital Versatile Disc'.*

Q117. Magnetic tape is primarily used for:

A. Fast random access storage
B. Backup and archival storage
C. Main memory
D. Cache storage

✔ **Answer: B**

■ *Magnetic tape provides sequential access and is used for large-scale backup and archival.*

Q118. A USB pen drive uses which type of memory?

A. DRAM
B. SRAM
C. Flash Memory
D. Magnetic

✔ **Answer: C**

■ *USB pen drives (flash drives) use NAND flash memory.*

Q119. The RPM (Revolutions Per Minute) of a hard disk refers to:

A. The speed of data transfer
B. The speed at which disk platters spin
C. The number of read/write heads
D. The storage capacity

✔ **Answer: B**

■ *Typical HDD speeds: 5400 RPM (laptops) and 7200 RPM (desktops). Higher RPM = faster access.*

Q120. Which optical disc uses a blue-violet laser?

A. CD
B. DVD
C. Blu-ray
D. HD-DVD

✔ **Answer: C**

■ *Blu-ray uses 405 nm blue-violet laser (shorter wavelength → smaller pit → higher capacity).*

Q121. RAID stands for:

A. Redundant Array of Independent Disks
B. Random Array of Independent Drives
C. Redundant Access of Integrated Disks
D. Rapid Array of Integrated Drives

✔ **Answer: A**

■ *RAID combines multiple physical disk drives for redundancy and/or performance improvement.*

Q122. Which storage medium provides the slowest access time?

A. SSD
B. HDD
C. Magnetic Tape
D. RAM

✔ **Answer: C**

■ *Magnetic tape has sequential access and is the slowest; used for archival backups.*

Q123. A floppy disk typically stores:

A. 700 MB
B. 4.7 GB
C. 1.44 MB
D. 128 MB

✔ **Answer: C**

■ *Standard 3.5-inch floppy disks store 1.44 MB. They are now obsolete.*

Q124. NAS stands for:

A. Network Attached Storage
B. New Access Storage
C. Network Access System
D. Non-volatile Attached Storage

✔ **Answer: A**

■ *NAS = Network Attached Storage; a file-level storage server connected to a network.*

Q125. Which is the most durable storage medium for long-term archival?

A. HDD
B. Magnetic Tape
C. SSD
D. CD/DVD

✔ **Answer: B**

■ *High-quality magnetic tape can last 30+ years in proper storage conditions, making it ideal for archival.*

SECTION 8: Scanners, Digitizers, Plotters & Modern Peripherals

Q126. A flatbed scanner produces output in which form?

A. Hard copy
B. Digital image file
C. Audio file
D. Video file

✔ **Answer: B**

Q127. Resolution of a scanner is measured in:

A. DPI (Dots Per Inch)
B. MHz
C. GB
D. Pixels only

✔ **Answer: A**

■ *Higher DPI in scanners means finer detail is captured in the digital image.*

Q128. A drum scanner uses which scanning technology?

A. CCD (Charge-Coupled Device)
B. PMT (Photomultiplier Tube)
C. CMOS sensor
D. Infrared sensor

✔ **Answer: B**

■ *Professional drum scanners use PMT technology; flatbed scanners use CCD or CIS sensors.*

Q129. 3D scanner is used to:

A. Print 3D objects
B. Capture 3D shape and geometry of physical objects
C. Scan 3D movies
D. Project 3D images

✔ **Answer: B**

■ *3D scanners create digital 3D models from physical objects, used in CAD, medical imaging, and animation.*

Q130. A digitizer converts:

A. Digital data to analog
B. Analog data (drawings/coordinates) to digital
C. Text to speech
D. Images to video

✔ **Answer: B**

■ *Digitizers/graphics tablets convert physical position or drawings into digital coordinates.*

Q131. A graphics tablet uses which device to draw/write?

A. Stylus/Pen
B. Mouse
C. Keyboard
D. Trackball

✔ **Answer: A**

■ *A stylus (electronic pen) is used with a graphics tablet/digitizer for precise drawing.*

Q132. Plotters are used to draw:

A. Text only
B. Vector graphics, engineering plans, maps
C. Raster images only
D. 3D objects

✔ **Answer: B**

■ *Plotters draw vector graphics including engineering drawings, maps, architectural plans with great precision.*

Q133. Which type of plotter moves the paper while the pen is stationary in one axis?

A. Flatbed plotter
B. Drum plotter
C. Electrostatic plotter
D. Inkjet plotter

✔ **Answer: B**

■ *In a drum plotter, the paper rolls on a drum while the pen moves horizontally.*

Q134. In a flatbed plotter:

A. The paper moves
B. The pen moves in both X and Y axes over stationary paper
C. Both paper and pen move
D. Neither moves

✔ **Answer: B**

■ *Flatbed plotters hold paper flat while the pen moves in both horizontal and vertical axes.*

Q135. A webcam is an example of which type of input device?

A. Audio input
B. Video/image input
C. Biometric input
D. Both B and C

✔ **Answer: D**

■ *Webcams capture video/images and can be used for facial recognition (biometric input).*

Q136. 3D printers create objects using which technique?

A. Subtractive manufacturing
B. Additive manufacturing (layer-by-layer)
C. Injection moulding
D. Laser cutting

✔ **Answer: B**

■ *3D printing = additive manufacturing; material is added layer by layer to create 3D objects.*

Q137. An Interactive Whiteboard (Smart Board) functions as:

A. Only a display device
B. Both input and output device
C. Only an input device
D. A storage device

✔ **Answer: B**

■ *Smart boards display content (output) and accept touch/stylus input (input device).*

Q138. A microphone converts:

A. Digital audio to analog sound
B. Sound (analog) to digital electrical signal
C. Text to speech
D. Video to audio

✔ **Answer: B**

■ *Microphones are input devices that convert acoustic sound waves to electrical/digital signals.*

Q139. Which of the following is a wireless input device?

A. Wired keyboard
B. Bluetooth mouse
C. PS/2 keyboard
D. USB scanner

✔ **Answer: B**

■ *Bluetooth/wireless mice and keyboards communicate without physical cables.*

Q140. VR headset is primarily which type of device?

A. Input only
B. Output only
C. Both input and output
D. Storage

✔ **Answer: C**

■ *VR headsets display immersive 3D environments (output) and track head movement/controllers (input).*

SECTION 9: Hardware and Software

Q141. Hardware refers to:

A. Programs and data used by a computer
B. Physical components of a computer that can be touched
C. The operating system
D. Applications installed on a computer

✔ **Answer: B**

■ *Hardware = physical, tangible components (CPU, RAM, HDD, keyboard, monitor, etc.).*

Q142. Software refers to:

A. Physical components of a computer
B. Programs, data, and instructions that tell hardware what to do
C. The keyboard and mouse
D. The monitor and printer

✔ **Answer: B**

■ *Software = intangible programs and data; it cannot be physically touched.*

Q143. Which of the following is system software?

A. MS Word
B. Photoshop
C. Windows 11
D. VLC Media Player

✔ **Answer: C**

■ *System software (OS like Windows, Linux, macOS) manages hardware and provides platform for applications.*

Q144. Which of the following is application software?

A. Linux
B. BIOS
C. Device Driver
D. Microsoft Excel

✔ **Answer: D**

■ *Application software performs specific user tasks (word processing, spreadsheets, games, etc.).*

Q145. Operating System (OS) is an example of:

A. Application Software
B. System Software
C. Utility Software
D. Programming Software

✔ **Answer: B**

■ *The OS is the most important system software; it manages hardware resources and provides user interface.*

Q146. Which of the following is NOT an operating system?

A. Windows 11
B. Ubuntu Linux
C. macOS Ventura
D. Microsoft Office

✔ **Answer: D**

■ *Microsoft Office is application software (word processor, spreadsheet, etc.), not an OS.*

Q147. A compiler is an example of which type of software?

A. Application software
B. System software
C. Language translator (system/utility software)
D. Operating system

✔ **Answer: C**

■ *Compilers, interpreters, and assemblers are language translators that are part of system software.*

Q148. The difference between a compiler and an interpreter is:

A. Compiler translates code line-by-line; interpreter translates the whole program at once
B. Compiler translates the whole program at once; interpreter translates line-by-line
C. Both work the same way
D. Compiler is for C; interpreter is for Java only

✔ **Answer: B**

■ *Compiler: translates entire source code to machine code at once (C, C++). Interpreter: translates and executes line by line (Python, JavaScript).*

Q149. Firmware is:

A. Software stored permanently in ROM/Flash memory of hardware
B. The latest version of Windows
C. A type of application software
D. Malicious software

✔ **Answer: A**

■ *Firmware is embedded software (like BIOS) stored in non-volatile memory, controlling hardware functions.*

Q150. Open source software means:

A. Software that is free to use only
B. Software whose source code is publicly available and can be modified
C. Software developed by the government
D. Software without copy protection

✔ **Answer: B**

■ *Open source software (Linux, Firefox, VLC) has publicly available source code that anyone can modify/distribute.*

Q151. Freeware is:

A. Open source software
B. Software available at no cost but source code may not be available
C. Paid software
D. Software only for educational institutions

✔ **Answer: B**

■ *Freeware = free to use but may be proprietary (e.g., Skype, Adobe Acrobat Reader – free but closed source).*

Q152. Shareware is:

A. Software shared among multiple users simultaneously
B. Trial software that can be used free for a limited period
C. Software developed by multiple companies
D. Free and open source software

✔ **Answer: B**

■ *Shareware allows trial use; users pay for continued use after trial period.*

Q153. Utility software is used for:

A. Business applications
B. System maintenance, optimization, and management tasks
C. Gaming
D. Web development

✔ **Answer: B**

■ *Utility software includes antivirus, disk defragmenter, backup tools, file compression tools.*

Q154. Antivirus software is an example of:

A. Application software
B. Operating system
C. Utility software
D. Firmware

✔ **Answer: C**

■ *Antivirus software is a utility that protects systems from malware/viruses.*

Q155. Device drivers are part of which software category?

A. Application software
B. System software
C. Entertainment software
D. Productivity software

✔ **Answer: B**

■ *Device drivers are system software that allow the OS to communicate with hardware devices.*

Q156. Which of the following is proprietary software?

A. Linux
B. Firefox
C. Microsoft Windows
D. LibreOffice

✔ **Answer: C**

■ *Microsoft Windows is proprietary (closed source). Linux, Firefox, LibreOffice are open source.*

Q157. GUI stands for:

A. Graphical User Interface
B. General User Interface
C. Graphical Unix Interface
D. Global User Interface

✔ **Answer: A**

■ *GUI (like Windows, macOS) uses icons, menus, and windows; CLI (Command Line Interface) uses text commands.*

Q158. Which company developed the Windows operating system?

A. Apple
B. IBM
C. Microsoft
D. Google

✔ **Answer: C**

Q159. Linux is an example of which type of OS?

A. Proprietary
B. Open source
C. Closed source
D. Commercial

✔ **Answer: B**

■ *Linux (created by Linus Torvalds in 1991) is a free, open-source OS kernel.*

Q160. Which of the following is a mobile operating system?

A. Windows 11
B. macOS
C. Android
D. Ubuntu

✔ **Answer: C**

■ *Android (Google) and iOS (Apple) are mobile operating systems for smartphones and tablets.*

SECTION 10: Types of Computers – Micro, Mini, Mainframe, Super

Q161. Which type of computer is designed for personal use?

A. Mainframe
B. Supercomputer
C. Microcomputer (Personal Computer)
D. Minicomputer

✔ **Answer: C**

■ *Microcomputers (PCs) use a single microprocessor and are designed for individual/personal use.*

Q162. The term 'Personal Computer' (PC) refers to which type of computer?

A. Minicomputer
B. Mainframe
C. Microcomputer
D. Supercomputer

✔ **Answer: C**

Q163. The first personal computer was introduced by:

A. IBM in 1981
B. Apple in 1976
C. Microsoft in 1985
D. Intel in 1971

✔ **Answer: A**

■ *IBM PC (1981) standardized the personal computer. Apple II (1977) was also very influential earlier.*

Q164. Minicomputers are also called:

A. Microcomputers
B. Mid-range computers
C. Mainframe computers
D. Supercomputers

✔ **Answer: B**

■ *Minicomputers are mid-range systems, more powerful than PCs but less powerful than mainframes.*

Q165. Which type of computer is used for large-scale data processing in banks and insurance companies?

A. Microcomputer
B. Minicomputer
C. Mainframe computer
D. Laptop

✔ **Answer: C**

■ *Mainframe computers handle millions of transactions simultaneously; used in banking, railways, airlines.*

Q166. The world's fastest computers are called:

A. Mainframes
B. Minicomputers
C. Supercomputers
D. Workstations

✔ **Answer: C**

Q167. Supercomputers are used for:

A. Personal use at home
B. Complex scientific calculations, weather forecasting, nuclear simulations
C. Office work
D. Gaming only

✔ **Answer: B**

■ *Supercomputers are used for weather forecasting, climate research, drug discovery, nuclear simulations.*

Q168. India's first supercomputer was:

A. PARAM 8000
B. PARAM Siddhi
C. Pratyush
D. Mihir

✔ **Answer: A**

■ *PARAM 8000 was developed by C-DAC (Centre for Development of Advanced Computing) in 1991.*

Q169. Which organization developed India's PARAM supercomputer series?

A. ISRO
B. DRDO
C. C-DAC
D. IIT Delhi

✔ **Answer: C**

■ *C-DAC (Centre for Development of Advanced Computing), Pune developed the PARAM series.*

Q170. A workstation computer is:

A. A low-end personal computer
B. A high-performance microcomputer for technical/scientific use
C. A type of mainframe
D. A portable computer

✔ **Answer: B**

■ *Workstations are high-end microcomputers used for CAD/CAM, scientific research, video editing.*

Q171. Laptops/Notebooks are which type of computer?

A. Minicomputer
B. Mainframe
C. Portable microcomputer
D. Supercomputer

✔ **Answer: C**

■ *Laptops are portable versions of microcomputers with built-in display, keyboard, and battery.*

Q172. A tablet computer typically uses which input method primarily?

A. Physical keyboard
B. Mouse
C. Touchscreen
D. Joystick

✔ **Answer: C**

Q173. Server computers are designed to:

A. Run video games
B. Provide services/resources to other computers on a network
C. Replace desktop PCs
D. Perform personal computing tasks

✔ **Answer: B**

■ *Servers provide file storage, web hosting, email, database, and other services to client computers.*

Q174. Which type of computer has the LARGEST processing power?

A. Desktop PC
B. Laptop
C. Mainframe
D. Supercomputer

✔ **Answer: D**

Q175. Embedded computers are:

A. Computers hidden inside buildings
B. Microprocessors/computers built into everyday devices (cars, microwaves, ATMs)
C. Computers used only in laboratories
D. Miniaturized desktop PCs

✔ **Answer: B**

■ *Embedded systems are dedicated microcomputers built into devices for specific control functions.*

Q176. The ENIAC was how much of a room-sized computer?

A. The size of a room (about 1800 sq. ft.)
B. The size of a briefcase
C. The size of a desktop PC
D. The size of a refrigerator

✔ **Answer: A**

■ *ENIAC weighed 30 tons, occupied 1800 sq ft, and consumed 150 kW of power.*

Q177. Handheld computers / PDAs are:

A. Very small portable computers
B. Large servers
C. Types of mainframes
D. Input devices

✔ **Answer: A**

■ *PDAs (Personal Digital Assistants) and smartphones are handheld computers.*

Q178. Which of the following is the correct order from least to most powerful?

A. Supercomputer < Mainframe < Minicomputer < Microcomputer
B. Microcomputer < Minicomputer < Mainframe < Supercomputer
C. Mainframe < Microcomputer < Minicomputer < Supercomputer
D. Minicomputer < Microcomputer < Supercomputer < Mainframe

✔ **Answer: B**

■ *Ascending order of power/size: Micro < Mini < Mainframe < Supercomputer.*

Q179. The IBM System/360 is a famous example of which type of computer?

A. Microcomputer
B. Supercomputer
C. Mainframe
D. Minicomputer

✔ **Answer: C**

■ *IBM System/360 (1964) was a landmark mainframe computer series.*

Q180. PDP-11 is a famous example of which type of computer?

A. Supercomputer
B. Mainframe
C. Minicomputer
D. Microcomputer

✔ **Answer: C**

■ *PDP-11 (by Digital Equipment Corporation, 1970) was one of the most successful minicomputers.*

SECTION 11: Assertion–Reason & Statement-Based MCQs

Q181. Assertion (A): RAM is called volatile memory.
Reason (R): RAM loses its data when the power supply is switched off.

A. Both A and R are true, and R is the correct explanation of A
B. Both A and R are true, but R is NOT the correct explanation of A
C. A is true but R is false
D. A is false but R is true

✔ **Answer: A**

■ *RAM is volatile because it loses all data when power is removed – the reason correctly explains the assertion.*

Q182. Assertion (A): The CPU is called the brain of a computer.
Reason (R): CPU processes all data and coordinates all operations.

A. Both A and R are true, and R is the correct explanation of A
B. Both A and R are true, but R is NOT the correct explanation
C. A is true but R is false
D. A is false but R is true

✔ **Answer: A**

Q183. Assertion (A): A compiler translates code line by line.
Reason (R): This allows faster execution than an interpreter.

A. Both A and R are true
B. A is false; R is true
C. A is false; R is false
D. A is true; R is false

✔ **Answer: B**

■ *A compiler translates the ENTIRE program at once (not line by line – that's an interpreter). Also, compiled code generally runs faster.*

Q184. Assertion (A): Secondary storage is non-volatile.
Reason (R): Secondary storage retains data even when power is turned off.

A. Both A and R are true, and R correctly explains A
B. Both A and R are true but R does not explain A
C. A is true, R is false
D. A is false, R is true

✔ **Answer: A**

Q185. Assertion (A): Cache memory is larger than RAM.
Reason (R): Cache is faster than RAM.

A. Both A and R are true
B. A is false; R is true
C. A is true; R is false
D. Both A and R are false

✔ **Answer: B**

■ *Cache is MUCH SMALLER than RAM (KB to a few MB), but much FASTER. Larger cache would be prohibitively expensive.*

Q186. Statement I: MICR is used in banking for cheque processing.
Statement II: MICR characters are printed using magnetic ink.

A. Only Statement I is correct
B. Only Statement II is correct
C. Both statements are correct
D. Neither statement is correct

✔ **Answer: C**

■ *Both statements about MICR are correct.*

Q187. Statement I: A supercomputer is slower than a mainframe.
Statement II: Supercomputers are used for weather forecasting.

A. Only Statement I is correct
B. Only Statement II is correct
C. Both are correct
D. Neither is correct

✔ **Answer: B**

■ *Statement I is WRONG – supercomputers are far faster than mainframes. Statement II is correct.*

Q188. Statement I: A plotter is an output device.
Statement II: A plotter is used to print high-quality large drawings.

A. Only I is correct
B. Only II is correct
C. Both are correct
D. Neither is correct

✔ **Answer: C**

Q189. Statement I: All input devices are also output devices.
Statement II: A touchscreen can function as both input and output.

A. Only I is correct
B. Only II is correct
C. Both are correct
D. Neither is correct

✔ **Answer: B**

■ *Not all input devices are output devices (keyboard is only input). But a touchscreen is correctly both.*

Q190. Statement I: SSD uses magnetic platters to store data.
Statement II: SSD is faster than HDD.

A. Both are correct
B. Only II is correct
C. Only I is correct
D. Neither is correct

✔ **Answer: B**

■ *Statement I is wrong – SSD uses flash memory chips (not magnetic platters, which is HDD). Statement II is correct.*

SECTION 12: Match-the-Following Style MCQs

Q191. Match the following:
List I (Device) → List II (Type)
1. Keyboard a. Output
2. Monitor b. Input
3. Printer c. Input
4. Scanner d. Output

A. 1-b, 2-a, 3-d, 4-c
B. 1-a, 2-b, 3-c, 4-d
C. 1-b, 2-a, 3-c, 4-d
D. 1-c, 2-d, 3-a, 4-b

✔ **Answer: A**

■ *Keyboard=Input(b), Monitor=Output(a), Printer=Output(d), Scanner=Input(c).*

Q192. Match the memory type with its characteristic:
1. RAM a. Non-volatile, holds BIOS
2. ROM b. Volatile, main working memory
3. Cache c. Fastest, near CPU
4. HDD d. Non-volatile, largest storage

A. 1-b, 2-a, 3-c, 4-d
B. 1-a, 2-b, 3-d, 4-c
C. 1-c, 2-d, 3-a, 4-b
D. 1-d, 2-c, 3-b, 4-a

✔ **Answer: A**

Q193. Match the storage medium with its capacity:
1. Floppy Disk a. 25 GB
2. CD-ROM b. 1.44 MB
3. DVD c. 700 MB
4. Blu-ray d. 4.7 GB

A. 1-b, 2-c, 3-d, 4-a
B. 1-a, 2-b, 3-c, 4-d
C. 1-c, 2-a, 3-b, 4-d
D. 1-d, 2-c, 3-a, 4-b

✔ **Answer: A**

■ *Floppy=1.44MB(b), CD=700MB(c), DVD=4.7GB(d), Blu-ray=25GB(a).*

Q194. Match the software with its category:
1. Windows 11 a. Utility software
2. MS Excel b. System software (OS)
3. Antivirus c. Application software
4. Device Driver d. System software

A. 1-b, 2-c, 3-a, 4-d
B. 1-a, 2-b, 3-d, 4-c
C. 1-c, 2-a, 3-b, 4-d
D. 1-d, 2-c, 3-a, 4-b

✔ **Answer: A**

■ *Windows=OS/System(b), Excel=Application(c), Antivirus=Utility(a), Driver=System(d).*

Q195. Match the generation of computers with their technology:
1. First Gen a. VLSI / Microprocessor
2. Second Gen b. Vacuum Tubes
3. Third Gen c. Transistors
4. Fourth Gen d. ICs (SSI/MSI)

A. 1-b, 2-c, 3-d, 4-a
B. 1-a, 2-b, 3-c, 4-d
C. 1-c, 2-d, 3-a, 4-b
D. 1-d, 2-a, 3-b, 4-c

✔ **Answer: A**

■ *1st=Vacuum tubes, 2nd=Transistors, 3rd=ICs, 4th=VLSI/Microprocessors.*

Q196. Match the abbreviation:
1. ALU a. Read Only Memory
2. ROM b. Arithmetic Logic Unit
3. OCR c. Central Processing Unit
4. CPU d. Optical Character Recognition

A. 1-b, 2-a, 3-d, 4-c
B. 1-a, 2-c, 3-b, 4-d
C. 1-c, 2-d, 3-a, 4-b
D. 1-d, 2-b, 3-c, 4-a

✔ **Answer: A**

Q197. Match the computer type with its use:
1. Supercomputer a. Personal use/home
2. Mainframe b. Weather forecasting, nuclear simulation
3. Minicomputer c. Bank transactions, airline reservations
4. Microcomputer d. Departmental tasks in medium businesses

A. 1-b, 2-c, 3-d, 4-a
B. 1-c, 2-b, 3-a, 4-d
C. 1-a, 2-d, 3-c, 4-b
D. 1-d, 2-a, 3-b, 4-c

✔ **Answer: A**

Q198. Match the CPU register with its function:
1. Program Counter a. Stores result of ALU operation
2. Accumulator b. Holds current instruction being executed
3. MAR c. Stores address of next instruction
4. IR d. Stores memory address to be accessed

A. 1-c, 2-a, 3-d, 4-b
B. 1-a, 2-c, 3-b, 4-d
C. 1-b, 2-d, 3-c, 4-a
D. 1-d, 2-b, 3-a, 4-c

✔ **Answer: A**

■ *PC=next instruction address(c), Accumulator=ALU result(a), MAR=memory address(d), IR=current instruction(b).*

Q199. Match the printer type with its mechanism:
1. Laser a. Strikes ribbon onto paper
2. Inkjet b. Uses laser + toner powder
3. Dot Matrix c. Sprays ink droplets
4. Thermal d. Uses heat on special paper

A. 1-b, 2-c, 3-a, 4-d
B. 1-a, 2-b, 3-c, 4-d
C. 1-c, 2-a, 3-d, 4-b
D. 1-d, 2-c, 3-b, 4-a

✔ **Answer: A**

Q200. Match the memory unit with correct value:
1. 1 Kilobyte a. 1024 GB
2. 1 Megabyte b. 1024 bytes
3. 1 Gigabyte c. 1024 MB
4. 1 Terabyte d. 1024 KB

A. 1-b, 2-d, 3-c, 4-a
B. 1-a, 2-b, 3-d, 4-c
C. 1-c, 2-a, 3-b, 4-d
D. 1-d, 2-c, 3-a, 4-b

✔ **Answer: A**

■ *1KB=1024 bytes, 1MB=1024KB, 1GB=1024MB, 1TB=1024GB.*

SECTION 13: Advanced & Higher-Order Thinking Questions

Q201. Which principle states that the number of transistors on a microchip doubles approximately every two years?

A. Shannon's Law
B. Moore's Law
C. Metcalfe's Law
D. Amdahl's Law

✔ **Answer: B**

■ *Moore's Law (Gordon Moore, 1965) has held true for decades, driving the exponential growth of computing power.*

Q202. Von Neumann architecture is characterized by:

A. Separate memory for instructions and data
B. A single memory storing both instructions and data, with a CPU
C. Parallel processing only
D. No use of RAM

✔ **Answer: B**

■ *Von Neumann architecture has: CPU + Memory (storing both program and data) + I/O, connected by a bus.*

Q203. Harvard Architecture differs from Von Neumann in that:

A. It has no ALU
B. It uses separate memory and pathways for instructions and data
C. It uses optical storage only
D. It has no control unit

✔ **Answer: B**

■ *Harvard architecture separates instruction memory and data memory, allowing simultaneous access (used in DSPs, microcontrollers).*

Q204. The Von Neumann bottleneck refers to:

A. Slow input devices limiting CPU speed
B. The limited bandwidth between CPU and memory creating a performance bottleneck
C. Insufficient storage capacity
D. Slow network connections

✔ **Answer: B**

■ *Since CPU and memory share one bus, data transfer becomes a bottleneck; cache memory helps alleviate this.*

Q205. Quantum computers use which fundamental unit of computation?

A. Bit
B. Byte
C. Qubit
D. Nibble

✔ **Answer: C**

■ *Quantum computers use qubits (quantum bits) that can exist in superposition (both 0 and 1 simultaneously).*

Q206. FLOPS stands for (in supercomputing context):

A. Floating Point Operations Per Second
B. Fast Linear Operations Per Second
C. Floating Line Output Processing Speed
D. File Loading Operations Per Second

✔ **Answer: A**

■ *FLOPS measures computing performance, especially for scientific calculations. Modern supercomputers achieve petaFLOPS.*

Q207. Which of the following correctly describes the difference between SRAM and DRAM?

A. SRAM needs refresh; DRAM does not
B. DRAM uses capacitors and needs refresh; SRAM uses flip-flops and does not
C. SRAM is cheaper and slower than DRAM
D. DRAM is used for cache; SRAM is used for main memory

✔ **Answer: B**

■ *DRAM: capacitors (need periodic refresh, cheaper, slower). SRAM: flip-flops (no refresh, faster, expensive). Cache uses SRAM; main memory uses DRAM.*

Q208. The process of loading an operating system into RAM when a computer starts is called:

A. Formatting
B. Booting
C. Compiling
D. Caching

✔ **Answer: B**

■ *Booting (from 'bootstrapping') is the process of loading the OS from secondary storage to RAM at startup.*

Q209. Cold boot and warm boot differ in that:

A. Cold boot = restarting from running state; Warm boot = starting from powered-off state
B. Cold boot = starting from powered-off state; Warm boot = restarting from running state
C. Both are identical processes
D. Cold boot is faster than warm boot

✔ **Answer: B**

■ *Cold boot (hard boot) = power on from off state. Warm boot (soft boot) = restart while power is on (Ctrl+Alt+Del).*

Q210. Thrashing in operating systems refers to:

A. CPU overheating
B. Excessive paging activity that reduces CPU efficiency drastically
C. Hard disk fragmentation
D. Cache overflow

✔ **Answer: B**

■ *Thrashing occurs when a system spends more time swapping pages in/out of virtual memory than executing processes.*

Q211. Which memory management technique divides memory into fixed-size blocks?

A. Segmentation
B. Paging
C. Swapping
D. Compaction

✔ **Answer: B**

■ *Paging divides physical memory into fixed-size frames and logical memory into pages of the same size.*

Q212. Defragmentation of a hard disk is done to:

A. Delete unused files
B. Rearrange fragmented files for faster access
C. Add more storage space
D. Repair bad sectors

✔ **Answer: B**

■ *Defragmentation consolidates fragmented file pieces on HDD for more efficient access. (Not needed for SSDs.)*

Q213. ASCII stands for:

A. American Standard Code for Information Interchange
B. American System Code for Information Interface
C. Automatic Standard Code for Information Interchange
D. Advanced Standard Code for Information Input

✔ **Answer: A**

■ *ASCII uses 7 bits to represent 128 characters (letters, numbers, symbols). Extended ASCII uses 8 bits (256 characters).*

Q214. Unicode was developed to:

A. Replace ASCII with a faster system
B. Support characters from all world languages (multilingual computing)
C. Compress text files
D. Encrypt data

✔ **Answer: B**

■ *Unicode (UTF-8/16/32) can represent over 1 million characters from all world scripts, solving multilingual computing.*

Q215. The hexadecimal number system uses base:

A. 2
B. 8
C. 10
D. 16

✔ **Answer: D**

■ *Hexadecimal uses 16 symbols: 0-9 and A-F. Used in memory addresses, colour codes (#FF5733), etc.*

Q216. Binary number 1010 in decimal is:

A. 8
B. 10
C. 12
D. 14

✔ **Answer: B**

■ *1010 = 1×8 + 0×4 + 1×2 + 0×1 = 8+2 = 10.*

Q217. Decimal 255 in binary is:

A. 11111110
B. 11111111
C. 11110000
D. 10101010

✔ **Answer: B**

■ *255 = 128+64+32+16+8+4+2+1 = 11111111 in binary.*

Q218. What is the hexadecimal equivalent of decimal 255?

A. FE
B. FF
C. EF
D. F0

✔ **Answer: B**

■ *255 = 15×16 + 15 = FF in hexadecimal.*

Q219. Octal number system uses base:

A. 2
B. 8
C. 16
D. 10

✔ **Answer: B**

■ *Octal uses digits 0-7 (base 8). Commonly used in Unix file permissions.*

Q220. Which logic gate produces output 1 only when all inputs are 1?

A. OR gate
B. AND gate
C. NOT gate
D. XOR gate

✔ **Answer: B**

■ *AND gate: output = 1 only if ALL inputs are 1. OR: output=1 if at least one input is 1.*

SECTION 14: Networking & Internet Basics (Bonus Topics)

Q221. LAN stands for:

A. Local Area Network
B. Large Area Network
C. Linear Access Network
D. Linked Area Node

✔ **Answer: A**

■ *LAN connects computers within a limited area (office, school, building).*

Q222. WAN stands for:

A. Wide Area Network
B. Wireless Area Network
C. World Area Node
D. Wired Access Network

✔ **Answer: A**

■ *WAN covers a large geographic area; the Internet is the world's largest WAN.*

Q223. The Internet is an example of which type of network?

A. LAN
B. MAN
C. WAN
D. PAN

✔ **Answer: C**

■ *The Internet is a global WAN connecting millions of networks worldwide.*

Q224. HTTP stands for:

A. HyperText Transfer Protocol
B. High Transfer Text Protocol
C. HyperText Transmission Program
D. High Tech Transfer Protocol

✔ **Answer: A**

Q225. WWW stands for:

A. World Wide Web
B. World Wide Wire
C. World Web Wide
D. Worldwide Website

✔ **Answer: A**

■ *WWW (World Wide Web) is a system of interlinked hypertext documents accessed via the Internet (invented by Tim Berners-Lee, 1989).*

Q226. IP address stands for:

A. Internet Protocol address
B. Internal Protocol address
C. Internet Processing address
D. Information Protocol address

✔ **Answer: A**

■ *An IP address is a unique numerical identifier assigned to every device on a network.*

Q227. WiFi is a technology for:

A. Wired local networking
B. Wireless local area networking
C. Wide area networking
D. Satellite internet

✔ **Answer: B**

■ *WiFi (IEEE 802.11 standards) provides wireless LAN connectivity.*

Q228. Email stands for:

A. Electronic Mail
B. Express Mail
C. Electronic Media
D. Enhanced Mail

✔ **Answer: A**

Q229. A modem is a device that:

A. Amplifies network signals
B. Modulates and demodulates digital-to-analog signals for transmission
C. Connects two LANs
D. Assigns IP addresses

✔ **Answer: B**

■ *Modem = MOdulator-DEModulator; converts digital signals to analog for telephone lines and vice versa.*

Q230. Which device connects multiple computers in a network and intelligently routes data?

A. Hub
B. Switch
C. Router
D. Repeater

✔ **Answer: C**

■ *Router routes data packets between networks. Switch connects devices in the same network. Hub broadcasts to all.*

SECTION 15: Previous-Year Style & Miscellaneous MCQs

Q231. Which of the following is a programming language?

A. HTTP
B. HTML
C. Python
D. WiFi

✔ **Answer: C**

■ *Python, C, Java, C++ are programming languages. HTML is a markup language; HTTP is a protocol.*

Q232. The process of finding and removing errors in a program is called:

A. Compiling
B. Debugging
C. Booting
D. Formatting

✔ **Answer: B**

■ *Debugging = identifying and fixing errors (bugs) in code.*

Q233. Which of the following stores data temporarily while a computer is working?

A. ROM
B. Hard Disk
C. RAM
D. CD-ROM

✔ **Answer: C**

■ *RAM is temporary (volatile) working memory; data is lost when power is removed.*

Q234. The physical components of a computer that you can touch are collectively called:

A. Software
B. Hardware
C. Firmware
D. Liveware

✔ **Answer: B**

Q235. A virus in computing is:

A. A type of hardware failure
B. A malicious self-replicating program that can damage files/systems
C. A type of network protocol
D. A programming language

✔ **Answer: B**

■ *Computer virus = malicious code that replicates itself and can corrupt/delete files.*

Q236. Malware is a term for:

A. Malfunctioning hardware
B. Malicious software (viruses, worms, trojans, spyware, ransomware)
C. Outdated software
D. Software that slows the computer

✔ **Answer: B**

■ *Malware = MALicious softWARE; includes all types of harmful programs.*

Q237. Which of the following is an example of social engineering attack?

A. SQL injection
B. Buffer overflow
C. Phishing email
D. DDoS attack

✔ **Answer: C**

■ *Phishing = social engineering attack where attackers impersonate legitimate entities to steal credentials.*

Q238. The binary system uses only two digits:

A. 0 and 1
B. 1 and 2
C. 0 and 2
D. A and B

✔ **Answer: A**

■ *Binary (base-2) uses only 0 and 1. All computer data is stored and processed as binary.*

Q239. Which among the following is the fastest memory?

A. Hard Disk
B. CD-ROM
C. RAM
D. CPU Registers

✔ **Answer: D**

■ *CPU Registers are the fastest memory, built directly into the processor.*

Q240. Full form of USB is:

A. Universal Serial Bus
B. Unified Serial Bus
C. Universal System Bus
D. United Storage Bus

✔ **Answer: A**

■ *USB = Universal Serial Bus; a standard interface for connecting peripherals to computers.*

Q241. Which port is commonly used to connect a printer to a computer?

A. PS/2 port
B. VGA port
C. USB port
D. HDMI port

✔ **Answer: C**

■ *Modern printers primarily connect via USB. Older printers used parallel (LPT) ports.*

Q242. HDMI stands for:

A. High Definition Multimedia Interface
B. High Data Media Interface
C. High Definition Media Input
D. High Density Multimedia Interface

✔ **Answer: A**

■ *HDMI carries high-definition audio and video signals; used to connect computers to HD TVs/monitors.*

Q243. Which key combination is used to take a screenshot in Windows?

A. Ctrl+C
B. Ctrl+V
C. Print Screen (PrtSc) or Win+PrtSc
D. Ctrl+Z

✔ **Answer: C**

■ *PrtSc copies screen to clipboard; Win+PrtSc saves directly to Screenshots folder.*

Q244. What does 'Ctrl + Z' do in most applications?

A. Redo
B. Undo
C. Save
D. Cut

✔ **Answer: B**

■ *Ctrl+Z = Undo (reverses last action). Ctrl+Y = Redo.*

Q245. The 'Recycle Bin' in Windows stores:

A. Downloaded files
B. Deleted files temporarily before permanent deletion
C. System files
D. Temporary internet files

✔ **Answer: B**

Q246. Which file extension is associated with executable programs in Windows?

A. .doc
B. .exe
C. .jpg
D. .txt

✔ **Answer: B**

■ *.exe = executable file (program). .doc=Word, .jpg=image, .txt=text file.*

Q247. RAM is measured in which unit?

A. GHz
B. GB or MB
C. DPI
D. RPM

✔ **Answer: B**

■ *RAM capacity is measured in MB (older systems) or GB (modern systems).*

Q248. CPU speed is measured in:

A. GB
B. MB
C. GHz
D. DPI

✔ **Answer: C**

■ *CPU clock speed = GHz. Modern CPUs range from ~1 GHz to 5+ GHz.*

Q249. Which generation of computers uses artificial intelligence most prominently?

A. Third
B. Fourth
C. Fifth
D. Second

✔ **Answer: C**

■ *Fifth-generation computers (in development) are based on AI, parallel processing, and natural language processing.*

Q250. The term 'Booting' is derived from:

A. Boot camp
B. 'Bootstrapping' – pulling oneself up by bootstraps
C. Boot disk
D. BIOS operations

✔ **Answer: B**

■ *Booting = system loading itself into operational state without external assistance ('pull yourself up by your bootstraps').*

MOCK TEST – 50 QUESTIONS (Mixed Topics)

Time Allowed: 50 Minutes | Marks: 1 per question | No Negative Marking

---

Q1. Which unit controls all operations in a CPU?

A. ALU
B. Memory Unit
C. Control Unit
D. Input Unit

Q2. RAM stands for:

A. Read Access Memory
B. Random Access Memory
C. Rapid Access Memory
D. Real Access Memory

Q3. The Father of Computer is:

A. Bill Gates
B. Alan Turing
C. Charles Babbage
D. John von Neumann

Q4. 1 GB = ?

A. 1024 MB
B. 1000 MB
C. 1024 KB
D. 1024 TB

Q5. Which is a non-volatile memory?

A. RAM
B. Cache
C. ROM
D. DRAM

Q6. First generation computers used:

A. Transistors
B. ICs
C. Vacuum tubes
D. Microprocessors

Q7. Keyboard is a/an:

A. Output device
B. Input device
C. Storage device
D. Processing device

Q8. Monitor is a/an:

A. Input device
B. Processing device
C. Output device
D. Storage device

Q9. Which printer can print carbon copies?

A. Laser
B. Inkjet
C. Dot Matrix
D. 3D Printer

Q10. CD-ROM capacity is approximately:

A. 1.44 MB
B. 4.7 GB
C. 700 MB
D. 25 GB

Q11. MICR is used in:

A. Supermarkets
B. Banks (cheque processing)
C. Libraries
D. Hospitals

Q12. CPU stands for:

A. Central Program Unit
B. Core Processing Unit
C. Central Processing Unit
D. Computer Processing Unit

Q13. Which language does the computer understand directly?

A. C language
B. Python
C. Machine language (binary)
D. Assembly language

Q14. Windows OS was developed by:

A. Apple
B. Microsoft
C. IBM
D. Google

Q15. An example of system software is:

A. MS Word
B. Photoshop
C. Linux OS
D. VLC Player

Q16. SSD is faster than HDD because:

A. It uses larger platters
B. It has no moving mechanical parts
C. It spins faster
D. It uses more power

Q17. The fastest component in memory hierarchy is:

A. Cache
B. RAM
C. Registers
D. Hard Disk

Q18. Blu-ray disc capacity (single layer) is:

A. 4.7 GB
B. 700 MB
C. 25 GB
D. 1.44 MB

Q19. OCR stands for:

A. Output Character Reader
B. Optical Character Recognition
C. Optical Code Reader
D. Output Code Recognition

Q20. BIOS is stored in:

A. RAM
B. Hard Disk
C. ROM/Flash Memory
D. Cache

Q21. Supercomputer is used for:

A. Office work
B. Personal use
C. Weather forecasting and complex simulations
D. Gaming only

Q22. Which is an open source OS?

A. Windows 11
B. macOS
C. Linux
D. iOS

Q23. A joystick is used primarily for:

A. Text input
B. Gaming
C. Scanning
D. Printing

Q24. USB stands for:

A. United System Bus
B. Universal Serial Bus
C. Unified Storage Bus
D. Universal Storage Board

Q25. The ALU performs:

A. Memory management
B. Arithmetic and logical operations
C. Input/output control
D. Booting the system

Q26. Magnetic tape is used for:

A. Fast random access
B. Main memory
C. Backup and archival storage
D. Cache storage

Q27. Which device is used to produce large engineering drawings?

A. Printer
B. Scanner
C. Plotter
D. Projector

Q28. EPROM can be erased by:

A. Electrical signals
B. Ultraviolet (UV) light
C. Magnetic field
D. Water

Q29. The correct order (slowest to fastest memory) is:

A. HDD → RAM → Cache → Registers
B. Registers → Cache → RAM → HDD
C. RAM → HDD → Cache → Registers
D. Cache → RAM → Registers → HDD

Q30. Which is an impact printer?

A. Laser
B. Inkjet
C. Thermal
D. Dot Matrix

Q31. A compiler:

A. Translates code line by line
B. Translates the entire program at once
C. Runs programs without translation
D. Stores programs in ROM

Q32. OMR is used for:

A. Cheque processing
B. Reading printed bar codes
C. Reading pre-marked answer sheets
D. Converting text to digital

Q33. PDA stands for:

A. Personal Desktop Application
B. Personal Digital Assistant
C. Portable Data Access
D. Personal Data Analyzer

Q34. Defragmentation is performed on:

A. SSD
B. RAM
C. HDD
D. CPU

Q35. Floppy disk storage capacity is:

A. 700 MB
B. 1.44 MB
C. 4.7 GB
D. 1 GB

Q36. DRAM needs periodic:

A. Cooling
B. Formatting
C. Refreshing
D. Defragmenting

Q37. Which bus carries memory addresses?

A. Data bus
B. Control bus
C. Address bus
D. System bus

Q38. ASCII uses how many bits?

A. 4
B. 6
C. 7
D. 8

Q39. India's first supercomputer was:

A. Mihir
B. PARAM 8000
C. Pratyush
D. Anupam

Q40. Binary 1111 in decimal equals:

A. 7
B. 14
C. 15
D. 16

Q41. Which is both an input and output device?

A. Printer
B. Scanner
C. Touchscreen
D. Keyboard

Q42. Hard disk is a _____ storage device.

A. Primary
B. Secondary
C. Cache
D. Virtual

Q43. HDMI is used to connect:

A. Printers
B. High-definition monitors/TVs
C. Keyboards
D. Pen drives

Q44. A 64-bit processor can address:

A. Only 4 GB RAM
B. Up to 2^64 bytes of memory theoretically
C. Exactly 64 GB
D. Only 32 GB

Q45. Moore's Law states that transistors on a chip double approximately every:

A. 6 months
B. 1 year
C. 2 years
D. 5 years

Q46. An inkjet printer works by:

A. Striking ribbons on paper
B. Spraying tiny ink droplets
C. Using laser and toner
D. Using heat on special paper

Q47. Virtual memory uses _____ to extend RAM.

A. Cache
B. Registers
C. Hard disk space
D. ROM

Q48. Which device converts sound to digital signals?

A. Speaker
B. Microphone
C. Headphone
D. Projector

Q49. RAID stands for:

A. Redundant Array of Independent Disks
B. Random Array of Independent Drives
C. Rapid Access of Integrated Disks
D. Redundant Access Independent Drives

Q50. The process of loading OS into RAM at startup is called:

A. Formatting
B. Compiling
C. Booting
D. Caching

MOCK TEST – ANSWER KEY
